

Bringing manufacturers and customers together with solutions!

Engine And Compressor Accessories manufactures sound attenuated enclosures, UL listed daytanks and sub-base tanks along with accessories such as fuel polishing systems and generator meter panels. www.daytank.com

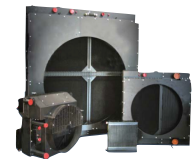

Innovation Energies specializes in cost effective solutions for LV & MV switchgear, switchboards, automatic transfer switches, generator breaker kits and controls (ANSI/UL). www.innovationenergies.com

GenKit is the tradename for Innovation Energies packaged circuit breaker solutions for Caterpillar and Cummins factory generator sets up to 750KW. Available for larger KW machines is the companion **GenBox** product. UL Listed available on most configurations. www.innovationenergies.com/generator-solutions.html

Josephson Manufacturing specializes in custom cooling systems for a variety of OEM applications from 40 to over 2000 HP. www.josephsonmfg.com

Marelli Electric has manufactured high quality generators and motors since 1891. With a product range that spans from 8 KW to 7000KW they are an OEM supplier to Caterpillar, MTU and many others. www.marellimotori.com

Heat Exchangers and Waste Heat Recovery from manufacturers such as Mueller, Cain, Thermal Transfer and others. Gasketed plate and frame, shell and tube heat exchangers for all process applications.

Modern Welding Co. produces UL Listed 142 and 2085 above ground fuel storage tanks. Standard or custom designs up to 30,000 gallon capacity. Round or rectangular configurations. www.modweldco.com

Temptec Insulation Blankets are designed and manufactured with the highest quality materials specifically for the power generation and OEM markets. www.temptecexhaustblankets.com

Mosebach has produced resistive grids for locomotive and mine haul truck applications for over 80 years. They now are applying that technology to neutral grounding resistors and loadbanks for the power gen market. www.mosebachresistors.com
